

I am extremely disappointed to hear about the LPFM that the FCC has introduced.

I listen and provide financial support to a station called AIR1. In my local community AIR 1 is the only local broadcasting that provides a positive influence. This station broadcasts through several FM translators. It presents a positive influence in my community by promoting morals and values. Many other stations promote humor and vulgarity at the expense of others. AIR1 offers my community an alternative to traditional, secular stations. Without it, I believe will be a community with young adults that have no positive influence through the medium of radio.

LPFM will harm this, and I hope you reconsider your choice to allow LPFM priority over the current FM Translator service.

Thank you.
